

Introduction of Test & Training International (SME), Austria

Dr. Michael Gatscha
Head of Research & Development

Brokerage Session
13 January 2011

– Our skills:

- designing & conducting of naturalistic driving studies,
- provision of videobased naturalistic Driving observation equipment (“pdrive system”: www.pdrive-system.com),
- technology acceptance studies,
- driver profiling & risk assessment,
- useability testing,
- evaluation of driver education & training
- development and implementation of track training facilities and driver training programmes

– Topics we are interested in:

KD4: Testing, trials and normative standards,

KD2: Usage patterns, economic models, actors involved

- Projects dealing with identification of e-vehicle usage patterns in **real circumstances** (Naturalistic Driving)
driving: who, when, where, how, why

and projects trying to identify:

- user/client acceptance of e-mobility vehicles & elements
- Impacts of e-mobility on road safety

- **Involvement in previous / ongoing projects in the area**
 - International Naturalistic Driving (FP7) studies: PROLOGUE (partner), DaCoTa (subcontractor), several national studies
 - Proposal raised regarding road safety impacts on e-mobility
